PROFILE SUMMARY

Full Stack Developer (MERN) with **3.8+ years** of hands-on experience in **Designing • Analyzing • Developing, Integrating •** and testing software applications. Proficient expertise in: **React.js • Next.js • Node.js • Express.js • Database Postgres.**

SKILLS

Languages: JavaScript • TypeScript • OOPS.

Technologies: React JS • Next JS • Redux (Toolkit) • Node Js • Express Js • Microservices • Monolithic Architecture • System Design • Generative AI (Prompt Engineering, OpenAI APIs)

Tools: GitHub • Bitbucket • Postman • Swagger • Figma • Jira

Databases: Mongo DB • Firebase • SQL Server.

Platforms: Linux • Windows • macOS • Visual Studio Code.

Cloud Tech: AWS • S3 bucket • AWS CloudWatch.

WORK EXPERIENCE

Company	Designation	From	To
Girikon Solutions	Full Stack developer	April'24	<i>Present Noida, India</i>
Simublade Technology	Software Engineer	April'22	<i>Oct'23 Noida, India</i>
ShipGig Ventures	Software Engineer	Aug'21	<i>April'22 Noida, India</i>

PROJECTS

GirikSMS | Apr'23 - Present'24

GirikSMS | SaaS-based Omnichannel Messaging Platform

Developed a scalable SaaS platform enabling businesses and applications to send and manage communications across multiple channels—SMS, WhatsApp, Facebook, Instagram, text-to-voice, and bulk messaging—with advanced scheduling and automation features. The platform supports real-time message tracking, role-based access, and secure API integrations for diverse organizational needs.

Technologies Used: **React JS • Node JS • PostgreSQL • WebSockets • Twilio API • Meta (WhatsApp, Facebook, Instagram APIs) • RESTful APIs • JWT Authentication • Webhooks • GitHub.**

Roles:

Worked on full-stack development, ensuring seamless communication between frontend, backend, and third-party APIs.

- Architected and implemented **WebSocket**-based real-time delivery tracking and status updates.
- Integrated **Twilio and Meta APIs** for **SMS, WhatsApp, Facebook, and Instagram** messaging. Developed bulk messaging, text-to-voice, and scheduling modules to enhance communication efficiency.
- Designed and optimized **PostgreSQL database** schemas to handle high-volume messaging data.
- Built a responsive React-based dashboard for campaign creation, analytics, and account management.
- Configured AWS infrastructure (S3, EC2) and set up CI/CD pipelines for smooth deployment.

Used Engines INC | E-commerce Platform

Engineered a user-friendly **e-commerce platform**, aimed at connecting buyers and sellers of used engines. The project focused on streamlining the purchasing process and improving the overall user experience within the automotive parts industry.

- Technologies Used: **React JS • Next JS • Redux Toolkit • React Bootstrap • ES6 • Node JS • Restful APIs • JWT Auth • Express JS • MongoDB • Data Modeling • S3 Bucket • AWS CloudWatch • Storybook • Github.**

Tavus | AI Video Cloning Platform

Tavus is the only **video personalization platform** with the power to take what you record once and automatically transform it into countless **AI-generated videos**, customized with unique voice variables to each customer to inspire loyalty and repeat conversions long after you hit send.

- Technologies Used: **React JS • ES6 • Hooks • Material UI • Context API • Restful APIs • Node.js • Express.js • JWT Auth • MongoDB • API Integration • Storybook • LogRocket • Github.**

PROFESSIONAL CERTIFICATION

- ***Certification of Professional Achievement in React JS (2023) - NamasteDev.com Online Course***

ACHIEVEMENTS

- **100% Performance Appraisal**
Recognized for outstanding contributions and dedication, achieving a perfect appraisal rating.

EDUCATION

- **MASTERS OF COMPUTER APPLICATION | (IGNOU) June2022 June2025**
